1. Claims 48 and 63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 48 and 63, as amended, are confusing, because claim 48 now essentially contains two definitions for compound (a) and claim 63 now essentially contains two definitions for compounds (a), (b), (c), and (d), and it cannot be determined to what extent the more narrow definitions limit or further define the broad definitions. In other words, multiple definitions of the same component within the same claim render the claims needlessly ambiguous.

2. The prior art rejection has been withdrawn in view of applicants' response. In view of patentees' disclosure that 2 to 25% of the NCO terminations of the prepolymer are preferably reacted with the silicon containing material, the resulting preferred 75 to 98% of NCO functional groups on the reaction product teaches away from applicants' requirement that all of the NCO groups be reacted.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
